Subject: Welcome Summation Customers!

WELCOME SUMMATION CUSTOMERS!

Dear Michelle,

We are very pleased to welcome you to the new AccessData Group and would like to assure you that we will continue to provide the customer service, support and outreach that you've become accustomed to. The Summation solutions you rely on will continue to be available as part of the "AD Summation" product line.

We'd like to take this opportunity to let you know what our goal is over the next year. As you may know, AccessData eDiscovery is an in-house eDiscovery software solution, which is used by corporations to address the electronic discovery lifecycle, from litigation hold through initial review. During the initial review of electronically stored information (ESI), both inside counsel and outside counsel are able to collaborate in real-time within AD eDiscovery's web interface to further cull the data for final review. Finally, AccessData eDiscovery allows users to generate a load file for import into popular attorney review tools, such as iBlaze, AD Summation Enterprise and CaseVantage.

Currently, there is a gap between the IT side and the Legal side of the eDiscovery process. At this point, regardless of which product a corporate entity uses to collect, process and analyze ESI, once the load file is generated, much of the initial work is lost—for example, notes and review tags—and the data must be processed again for use in the attorney review product.

No more load files...

Over the next year, AccessData Group will integrate AccessData eDiscovery with Summation technology to create a single, modular solution. *This single eDiscovery solution will literally walk users through each phase of the eDiscovery lifecycle, from litigation hold to trial.* However, the individual modules will be available separately for those who are just in need of a litigation hold solution or a case management solution, for instance.

The integrated eDiscovery, litigation review and case management product will bridge the gaps that currently exist between IT and corporate counsel, and those between corporate counsel and outside counsel. Corporations and outside counsel will be able to work together seamlessly, from the beginning, to optimize early case assessment, case management and, of course, cost savings.

While we are working hard to create a single solution that will revolutionize the eDiscovery process, we are also committed to developing the AD Summation product line. For example, iBlaze and AD Summation Enterprise are robust case management solutions that allow users to manage depositions, case pleadings, transcripts, case timelines, casts of characters, chronologies of events,

multimedia testimony and evidence. The AD Summation product line will continue to grow in these areas, and we are working to enhance the stability, capacity and search capabilities of these products, as well.

We look forward to better meeting the needs of our Summation customers. If you have any questions or concerns, please contact us at 800-574-5199 / +1 801-377-5410, and for more information on AccessData eDiscovery and the AD Summation product line, please visit www.eDiscoveryWithAccessData.com

Sincerely,

AccessData Group, LLC
